MARSDEN CLASSIC & WHITLEY

As we continue to improve the long term durability of our products we will now be offering 9mm MDF reinforcing as standard in our Whitley and Marsden Classic Range.

CONCAVE PANELS

As we have become aware of instances of visibility through the moulded areas on our concave panels (Stanford, Aston, Arley Broughton, Gosfield and Hardford) depending on the reinforcing supplied. We have made the decision to supply the above named concave panels complete with 4mm MDF reinforcing as standard. This will eliminate any such problems from arising due to the MDF running through the centre of the panel and not directly with the concave part of the moulding.

Please note: This is also recommend in the Houghton Half Panel. MDF cannot be fitted in the centre of a 20mm panel.

TOUGHENED FLEMISH GLASS

Customers are advised to note that "Toughened Flemish Glass" is extremely susceptible to inherent faults such as spasmodic marking and /or distortion. These marks and/or distortion are permanent, and will remain noticeable for the duration of the lifespan of the glass. Orders for Toughened Flemish Glass will only be accepted on the understanding that in the event that the glass is marked and/or distorted, it will be deemed to be of an acceptable quality.

DESIGN LIMITATIONS

Some of our designs you will see from the brochure and reading the special design notes are specifically made and therefore we are unable to alter any part of the designs. Please ensure that you have read and understood the design note before ordering.

PROFILE COLOUR MATCHES

As you are already aware we offer 10 shades of white Pvc, 2

shades of mahogany woodgrain as well as Rosewood and Sherwood Oak. It is important when placing your orders that you supply the correct information relating to the Profile that you are using. If you are unsure of what colour match you may require or your profile company has changed, we will be happy to colour match a sample of your profile for you to ensure that you are supplied the best possible match available.

UNGLAZED PRODUCTS

Please ensure that all units you are manufacturing for unglazed panels are made at the correct thickness 2mm less than the overall thickness of the panel. We have templates that we can supply for our full range of door styles which we suggest you request.

CUT TO SIZE

We offer a cut to size service on all our panel range, it is important that you check size required against the minimum and maximum sizes available on each design. For conservatory panels it is also important to check each cut is available allowing equal measurements each side. All our panels are cut equally both on width and height unless otherwise stated on individual orders. It must be marked clearly for any changes you require. For cut to size flat panels we offer an optimising service and will supply the panels required using the most economical panels with the least wastage.

LETTER PLATE

Hallmark recommend that all letterplate routing has radius corners to avoid potential stress fractures.

TEMPERATURES

Hallmark recommend Panels are cut in temperatures above 12°C.

NETT PRICES

All nett prices are subject to discounts agreed in writing by your Business Development Manager
